ENVIRONMENTAL LAW II
(Toxics and Hazardous Waste)

Professor Andreen     Spring Semester 2020

Environmental Law II presents a comprehensive overview of the federal laws that control the use, discharge, and disposal of toxic and hazardous pollutants. We study such statutes as the Resource Conservation and Recovery Act (RCRA), the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA or Superfund), the Toxic Substances Control Act, and the Emergency Planning and Community Right-to-Know Act, as well as the toxics provisions in the Clean Water and Clean Air Acts. We will also take a close look at environmental enforcement and focus our attention for a couple of classes on Climate Change.

Environmental Law I is not a prerequisite for this course.

Required Reading:

- Supplemental Materials (2020) – posted on TWEN

Assignment for the First Day of Class:

Tuesday, January 7, 2020  1-26, 29-46 (Percival casebook)

I. Introduction to Environmental Law

A. A Few Housekeeping Matters (Course details)
B. Historical Perspectives
C. Policy Perspectives
D. An Outline of the Course

I will hand out the course syllabus during the first class session. You may also pick it up, if you wish, on the floor outside my office.

Best wishes,
