• The book is organized in sections called “Assignments.” At the end of each assignment, there is a “problem set.”
• For the first class, please read Assignment 1 and attempt to answer all the questions in Problem Set 1.
• For your convenience, the page numbers are 3-21 in the textbook (LOPUCKI, WARREN & LAWLESS, SECURED TRANSACTIONS: A SYSTEMS APPROACH (8th ed. 2016)).

When you read the Vitale and the Ellerbee cases, you don't need to focus on all the technical terms. Instead, I want you to focus on the collection process itself and develop a sense of the relevant steps involved.
